**Architect/Engineer:** Unknown

**Present Owner:** United States Air Force

**Significance:** The Base Engineer Covered Storage Building provided covered storage for equipment and supplies not requiring regular warehouse storage, yet needing protection from the weather. Items usually stored in this type of facility--such as steel, vitreous clay and concrete pipe, roofing material, crating material, and plumbing and electrical supplies--were essential to plant operations and maintenance.

**Project Information:** Building No. 2566 at Plattsburgh Air Force Base (AFB) is being documented in accordance with HAER standards to mitigate for the potential adverse effects of transferring deed of title to the property from federal ownership. The property transfer is a result of the disposal and reuse of Plattsburgh AFB, pursuant to the Defense Base Closure and Realignment Act of 1993. The mitigation is a stipulation of a Programmatic Agreement (PA) among the U.S. Air Force, the New York State Historic Preservation Officer, and the Advisory Council on Historic Preservation (October 2000).
